NATIONAL POLICY OF THE FISHERIES AND AQUACULTURE SUBSECTOR

The Ministry of Production (PRODUCE), in collaboration with FAO, is developing a proposal for a National Policy on Fisheries and Aquaculture, with the aim of having a document that establishes the orientation in the short and medium term of fishing and aquaculture management in the Peruvian economy.

NATIONAL POLICY OF THE FISHERIES AND AQUACULTURE SUBSECTOR

In 2017, a work structure was agreed upon to guide the entire process:

- a) Compile and systematize the available information.
- b) Participatory workshops under the methodology of focal groups .
- c) Preparation of a national diagnosis of fisheries and aquaculture, identifying problems and their dimensions.
- d) Proposal of general, specific objectives, axes of development of the National Policy on Fisheries and Aquaculture and socialization.
- d) Preparation of a Strategy and Action Plan for the implementation of the National Policy on Fisheries and Aquaculture.
- e) Presentation of the final proposal of the National Fisheries and Aquaculture Policy, pre-publication, systematization of observations and comments.

Fisheries and Aquaculture

PESEM
2017-2021
(RM N° 354-2017-
PRODUCE)

STRATEGIC OBJECTIVES

1. Increase the competitiveness of the economic agents of the Production Sector.

2. Strengthen the business development of the MIPYMES.

3. Improve the value chain of hydrobiological products.

Fisheries and Aquaculture

PESEM
2017-2021
(RM N° 354-2017-
PRODUCE)

Improve the value chain of hydrobiological products.

ESTRATEGIC ACTIONS

Promote the formalization of the artisanal and aquaculture fishing activity

Improve the level of compliance with health and safety standards of products of fishery and aquaculture origin

Promote access to financing of artisanal fisheries and aquaculture

Promote innovation in fisheries and aquaculture

Promote the internal trade of hydrobiological products

Strengthen the management of fisheries and aquaculture by making sustainable use of hydrobiological resources

Promote the sustainable development of aquaculture

ACCIÓN ESTRATÉGICA:

Promote innovation in fisheries and aquaculture

Expenditure on research, development and innovation of the companies in the sector, fisheries and aquaculture

NATIONAL PROGRAM OF INNOVATION IN FISHERIES AND AQUACULTURE

NATIONAL ESTRATEGY OF INNOVATION IN FISHERIES AND AQUACULTURE.

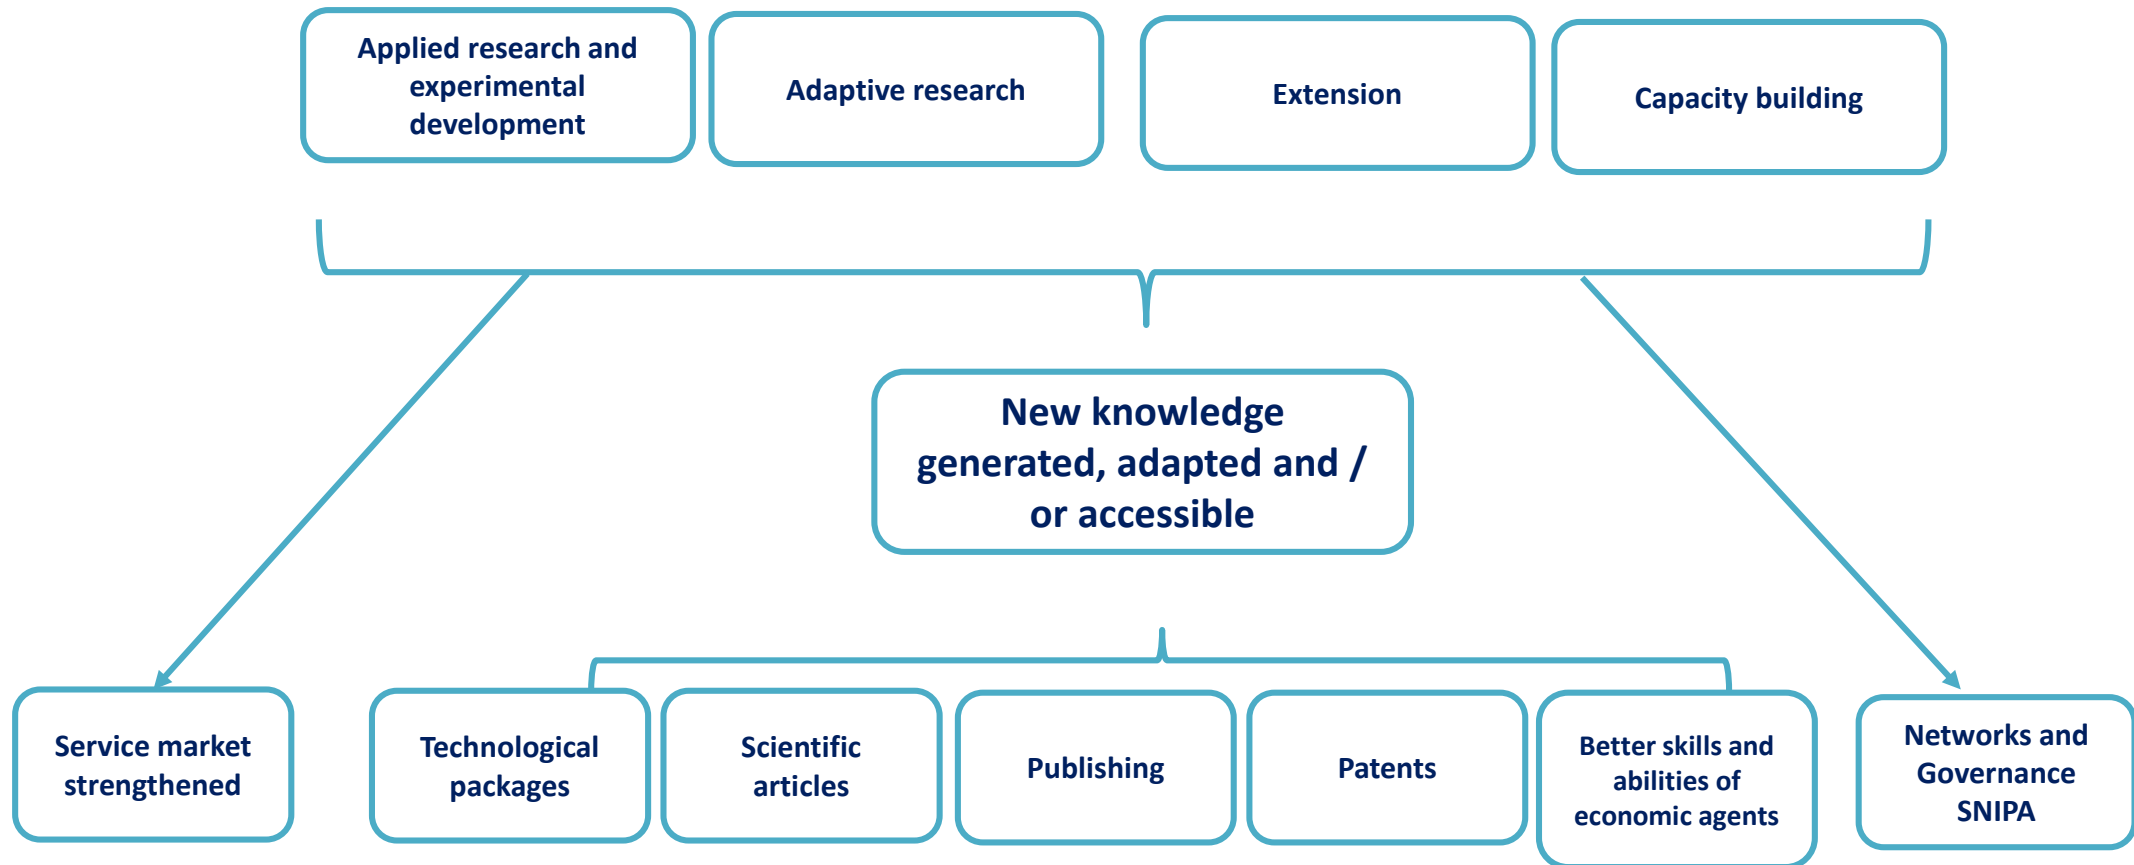

NATIONAL PROGRAM OF INNOVATION IN FISHERIES AND AQUACULTURE

- This program seeks to renew the model of competitive development of fisheries and aquaculture, promoting its competitiveness, its sustainable contribution to food security, productive diversification and the conservation of natural resources.
- One of the main challenges of the PNIPA is to move from an extractive development model to another for culture development, and it will do so by connecting economic opportunities with ideas and development projects in the Peruvian economy.
- It has the main office in Lima and six offices in Piura, San Martin, Ancash, Junin, Cusco and Puno.

Participating Entities

EXPECTED RESULTS

APEC PROJECTS

PROJECT TITLE	OBJECTIVE
Development of Tools of Ecological Risk Assessment of Impacts of Climate Change on Fisheries and Aquaculture Resources (2016)	Strengthen the capacity building regarding the existing ecological risk assessments for mitigation and adaptation to climate change impacts in marine fisheries and aquaculture resources and their supply chains.
Developing a Manual of Good Practices to Improve the Supply Chain of Marine Products Aiming to Maintain Health of the Fish Stock, Strengthening Food Security and Enhancing Trade in the Asia-Pacific Region (2015)	Improve the supply chain of marine products to increase economic growth of fisheries, to achieve healthier products for human consumption, to strengthen food security, to create more job opportunities for fishermen's family, to decrease the extractive pressure and maintain the health of marine resources and, in an indirect way, strengthen the trade of fishery and marine products.
Potential Contribution of Small Pelagic Fish to Food Security within the Pacific Region (2010)	Contribute to the long term food security in Indonesia and Philippines by offering a sustainable source of high-quality protein at low cost, providing examples to other APEC economies
Harmonizing Quality and Traceability Standards for Pecten Trade in the Asia - Pacific Region (2008)	The main objective of the project is to create a mechanism to be able to characterize the quality of Pectens which are commercialized in the Pacific river basin.
